	о. <sub>— —</sub>	RICKY D. SH PATENT EXAM ART UNIT 2	

Application/Control Number: 09/759,913

Art Unit: 2872

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Gunnar G. Leinberg on 07/11/2006.

2. The application has been amended as follows:

In claim 62, line 5, the language "of sample" has been changed to read -- of a sample--.

In claim 62, line 6, the language --wherein the polarization converter comprises:-- has been inserted after "the inhomogeneously polarized optical beam;".

In claim 77, line 7, the language --wherein the producing the homogeneously polarized optical beam comprises:-- has been inserted after "the inhomogeneously polarized optical beam;".

- 3. The drawings filed on July 02, 2004 are accepted by the examiner.
- 4. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or fairly suggest a microscope comprising a source for a homogeneously polarized input optical beam; a polarization converter which produces an inhomogeneously polarized optical beam from the homogeneously polarized input optical beam; a microscopic imaging system which captures an image using the inhomogeneously polarized optical beam, wherein the polarization converter comprises: a first polarization beam splitter that splits the homogeneously polarized input optical beam into a first part and a second part, a first phase shifter which shifts at least one portion of the first part of the input optical beam by a first

phase, a second phase shifter which shifts at least one portion of the second part of the input optical beam by substantially the first phase and a second polarization beam splitter which combines the phase shifted portion and substantially all other portions of the first part of the input optical beam with the phase shifted portion and substantially all other portions of the second part of the input optical beam to produce the inhomogeneously polarized optical beam, as recited in claim 62, lines 2-16 as well as the method thereof, as recited in claim 77, lines 3-16.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ricky D. Shafer whose telephone number is (571) 272-2320. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
